JUTRON Vision

enhancing vision ~ enriching life

Part # 254700 Lea Mailbox Game

- Used to assess visual perception of line orientation. Tests two components:
 - Information for the hand movements in the parietal lobe and
 - Picture perception in the inferior temporal lobe.
- To observe the first function, the child is asked to drop a card through the slot of the LEA Mailbox Game.
- The child should demonstrate perception of the orientation of the slot by turning the card to the correct position before moving it half the distance to the slot (dorsal stream function).
- A ventral stream function can be observed through interactive play using the LEA Mailbox Game.
- If a child cannot visually perceive the orientations of lines, drawing them may be difficult, and drawing angles will make no sense.
- Includes instructions.
