660700 Wolff Wand Kit with Stand

- The Wolff Wands Kit provides specialized fixation targets used in various procedures such as retinoscopy, cover test, and ocular motility. Various techniques employ the wands to evaluate accommodative lag, anisometropia, near point convergence, tracking, peripheral awareness, and saccadic eye movements.
- The Wolff Wand kit contains a 1/2" (13 mm) polished brass ball, a nickel-plated ball, and both a large and small acrylic fixation ball. The Wolff Wand Stand is also included in this kit. The rods are 14" (35.6 cm) and are made of aluminum for durability.
