## # E/FSH Dynamic Fusion Slides Holder (VTE)

### Dynamic Fusion Slides Holder VTE

The VTE Dynamic Fusion Slides Holder enhances the effectiveness of your VT program because it allows for the fusion targets (tranaglyph series, transparent fusion cards, Vectograms ) to be used in a variety of conditions. Unique design of the rear screen allows for improve Base-In deep awareness and localization. New lighting sources: LED White - Light gives uniform diffuse lighting over the entire target. 100,000 hours life light guaranteed. The slide holder's curved profile allows the simultaneous use of three slides. Three tracks which gives additional flexibility of target use and enhanced central-peripheral procedures. Improved target life because the track design reduce scratches. The track of the middle can be moved down or up, it allows to use targets with different heights. Rear screen can be removed for unlimited BI capabilities. One of the most important features of using a removable holder in addition to using a stationary vectogram holder, is that it allows the patient to move for dynamic free space activities (sports version). Removable target holder can be place on an overhead projector for enhanced peripheral
