HFIX+ Fixation Paddles, Cling Slides & Cling Tranaglyphs™

The new clear fixation paddle is 12" x 12" made of clear polycarbonate. Uses targets with cling material which adheres and removes easily from the front or back of the paddles by adhesion forces.

The new clear fixation paddle is 12" x 12" made of clear polycarbonate. Uses targets with cling material which adheres and removes easily from the front or back of the paddles by adhesion forces.

Targets can be layered to set prismatic demands, including vertical! They allow patient to fuse in free space, shift accommodation through the paddles and back to the target. By turning the paddles around you can easily shift from base-in to base-out demand, as well as change the 3D target from coming towards you to going away.

The In-Office unit (HFIXIO) is a two-piece model that comes with comfortable

plastic handle. The Home unit (HFIXH) is one piece, clear polycarbonate. Red/Green Clings are available in High Definition (HD) or half tones. Half tones cancel better but don't work well except against white wall or lit surface. HD work well for Sports Vision Training. Peripheral awareness letter chart is used to develop the ability to maintain fixation over time. It also improves peripheral awareness and helps to avoid peripheral vision restrictions and to reduce visual stress. The chart is on a cling material that statically clings to flat surfaces such as windows, clear acrylic, or other smooth surfaces.

Discount Sets:

In-Office Paddle and All (7) Clings + (1) Dither Pattern (HFIXIOSET)

Eight Tranaglyphs on Cling material:

- PER3A - Peripheral Awareness Cling (Black Ink) New!
