JUTRON Vision

enhancing vision ~ enriching life

JWRPM Rotation Pegboard Machine (RPM-2)

A variable-speed, dual-direction pegboard Rotator. Can be used in testing and training for oculomotor pursuit movement, providing visual resolution training and perception of stereoscopic effect with monocular vision and visual tactile training.

Rotation Pegboard Machine comes with the pegboard disc. The red/green disc (available separately) allow for training with red/green goggles. Improvement can be monitored by increasing speed from one to 100 revolutions per minute. Additional training can be done by positioning the rotating table in a variety of angles—from 0 to 90 degrees from the horizontal position. Dynamic visual acuity measurements can be accurately recorded and reproduced. Eye-hand coordination is also enhanced and can be monitored. One-year warranty on parts.
