## # BSFIXKIT+ Bernell Space Fixator Kits

The unit now has the ability to tighten the U Channel if the acrylic target ever becomes loose. Also, new bushing allows for effortless 360° swivel.

The unit quickly adjusts for any height of child or adult. The rectangular acrylic panel easily rotates showing the too hard of a touch by the user.

Bernell sells cling tranaglyphs that can be used with the fixator. Cling material can be cut with scissors and partial targets used one or more lines at a time as well as mixed as shown to right. You can set the unit in the middle of a room and do training while looking through it at a distance chart or even a Marsden Ball.

Acrylic Target Size: 24" x 32"
