JUTRON Vision*enhancing vision ~ enriching life*

POHOK Professional Ophthalmoscope Head Only

Precision Capabilities for the Ophthalmic Professional

Single Dioptre Steps from +9 to -10 allow precision changes to lens power.

A secondary Auxiliary Lens Wheel allows secondary lenses to provide +/-20 jumps in Dioptre lens power.

Additional Glaucoma graticule provides improved diagnostic capabilities.

Available with a 2.8V or 3.6V Bulb or LED Illumination.

2.8V models accept AA Batteries. 3.6V models accept rechargeable 3.6V Lithium Battery, charger sold separately.

This product is only the head of the Ophthalmoscope, for your existing Handle, for the complete instrument see our other products.

Blue Caps indicate 2.8V Handle, Red Caps indicate 3.6V Handle.

The LED Head is compatible with either voltage handle.

Optical Excellence, Manufactured in the UK

Contents:

Professional ophthalmoscope

Instructions CD

Features:

Positive action maywheel lens control allows you to select lens powers from +29D to -30D

Precision Changes in Dioptre lens power.

Step changes from +9D to -10D.

Auxiliary wheel for +/-20D step changes.

Six diagnostic beams for full diagnostic capability

Wide Angle – for general examination.

Macula – for more detailed views.

Intermediate – providing easier access for non-dilated pupils and in peripheral examination. Ideal for paediatrics.

Slit – to determine retinal elevations and depressions. Used to access the anterior chamber depth.

Glaucoma – projects a graticule onto the retina to determine the optic cup/disc ratio to aid glaucoma diagnosis.

Fixation Cross – projects a graticule onto the retina for assessment of eccentric fixation.
