## # ESC2000 Illuminated ETDRS Clinical Trial Cabinet

The ESC2000 Illuminator Cabinet provides a uniform retro-illuminated testing surface, ideal for clinical testing of high Contrast and low Contrast LogMAR tests, including ETDRS, LEA SYMBOLS®, LEA NUMBERS®, E and C Charts, etc. The cabinet utilizes a pure-white LED light source. This illuminator, due to the use of new technology LEDs, has a much smaller footprint (only 3.0 inches deep) than traditional ETDRS, light boxes.

The ESC provides for low cost maintenance and usage. The LEDs have a 50,000 hour longevity (20+ years of normal use), compared to fluorescent bulbs, which have to be replaced every 2,000 hours or about once a year. Simply turn on the ESC device and it is ready for testing. For use outside the US, the ESC has a universal power supply that is easily adapted from 100V to 240V.
