BSTICKS Bernell Saccadic Sticks

This multi-functional training tool is a great addition to any therapy room. The Bernell Saccadic Sticks were created to aid patients in training saccadic eye movements in free space. They also allow for training anti-suppression, pursuits, jumps, and much more.

Each four-sided stick includes: (1) black and white linear targets with numbers and letters, (1) black and white linear target with characters and symbols, (1) red and green linear target with numbers and letters and (1) red and green target with characters and symbols. Additionally, each side contains targets for near point of convergence testing.

Each 2 ft stick is made of durable, clear acrylic and comes with a comfortable rubber grip on one end and an eye hook on the other for hanging the sticks on the wall or attaching string (not included) to utilize the sticks as linear Marsden balls. Sold only as a pair.

Length: 25" (Including hook)

Material: Clear Acrylic

Weight: 8.4 oz. Each
